3<sup>rd</sup> November 2021

Dear Parent/Guardian,

On Friday 5th November we will be starting our new Science topic based on Human Development and Life Cycles. Part of this unit of work will involve us learning about puberty. We will be learning about the changes our bodies go through during puberty. We will take a biological approach which will be balanced with an emphasis on feelings and emotions.

As part of our planning for the delivery of this programme we have ensured that there is consistency with our school's ethos and related policies, such as safeguarding, equalities and bullying.

The work will be delivered by Mr Tipton, our University of Chester trainee Teacher. There will be opportunities for the children to work in mixed and single gender groups and exercises will be adapted to take into account different levels of maturity and ability. We encourage pupils to ask questions and seek further information.

If you should wish to see any resources being used during the lesson, I am more than happy to share them with you or alternatively if you have any questions for myself or Mr Tipton, we are happy to discuss them with you.

Many thanks

Mrs Baillie  
Class Teacher
